Chiara Pratola was born in Anagni (FR), Italy, in 1982. In May 2008, she received the Laurea Specialistica (M.S.; summa cum laude) degree in Environmental Engineering from the Tor Vergata University, Rome. Her thesis work was to implement a fully automatic classification algorithm, using very high resolution optical satellite images (QuickBird). In June 2008, she joined the Earth Observation Laboratory, Tor Vergata University, Rome, where she worked on oil spill and ship detection in ERS and ENVISAT images. Since November 2008, she is pursuing the Ph.D. degree in GeoInformation at the Earth Observation Laboratory. Her research is focused on features extraction from very high resolution SAR imagery acquired by Cosmo-SkyMed and TerraSAR-X satellites. Currently she is also working for Geo-k S.r.l., on Environmental Impact Assessment data management for the Italian Ministry of Environment.
